ANALYTICAL RESULTS

| | Value/ Uncertainty | U.M. | LoQ | LoD | R | Start/end date of analysis | Op. units w | Ro |
|--|--------------------|------------------|--------|------|----------|----------------------------|-------------|-----|
| ON SAMPLE AS IT IS | | | | | | | | 1 |
| CHLORIDES Met.: MP 0464 rev 11 2025 | 26,3±2,0 | g/100g (as NaCl) | 0,010 | | | 30/07/2025-11/08/2025 | 01 | 2 * |
| ASCORBIC ACID (VITAMIN C) Met.: MP 2174 rev 3 2019 | 48 800±9 000 | mg/100 g | 1,0 | | | 30/07/2025-08/08/2025 | 01 | 3 |
| MAGNESIUM Met.: MP 1289 rev 19 2025 | 23 100±4 400 | mg/kg | 25 | 5,0 | 103.4# | 30/07/2025-12/08/2025 | 02 | 4 |
| SODIUM Met.: MP 1289 rev 19 2025 | 98 000±18 000 | mg/kg | 25 | 5,0 | 103.4# | 30/07/2025-12/08/2025 | 02 | 5 |
| ZINC Met.: MP 1288 rev 24 2025 | 1 510±290 | mg/kg | 0,50 | 0,17 | 108.69 # | 30/07/2025-07/08/2025 | 02 | 6 |
| PIRIDOXAL 5PHOSPHATE Met.: MP 558 2023 Rev.4 = The test has been subcontracted to laboratory ECAMRICERT SRL and is part of the scope of accreditation of the same laboratory accredited by ACCREDIA with number 0699. | | | | | | 31/07/2025 | EXT | 7 |
| Piridoxal 5phosphate monohydrate (calculation) | 0,370±0,054 | g/100 g | 0,0025 | | | 04/08/2025 | | 8 * |
| Piridoxal 5phosphate | 0,345±0,050 | g/100 g | 0,0025 | | | | | 9 * |

Information on test methods and/or requirements/specifications

Row (2) Method: MP 0464 rev 11 2025 = The internal method MP 0464 is based on ISO 21422, AOAC 2016.03 and ISO 5943|IDF 88
Row (45) Method: MP 1289 rev 19 2025 = The internal method MP 1289 is based on the standard method AOAC 2011.14
Row (6) Method: MP 1288 rev 24 2025 = The internal method MP 1288 is based on the following standard methods AOAC 2015.06 , EN 15763:2010, EPA 6020 B 2014
Row (7) Method: MI_558_2023_Rev.4 = The test has been subcontracted to laboratory ECAMRICERT SRL and is part of the scope of accreditation of the same laboratory accredited by ACCREDIA with number 0699.

The line marked by a star (*) is not accredited by Accredia, member of MLA.
If not otherwise specified, the uncertainty is extended and has been calculated with a coverage factor k=2 corresponding to a probability interval of about 95%. For parameters whose extended uncertainty is greater than the result, since it is not possible to express a negative concentration, the final result is expressed in square brackets, which mean that the true value is between zero, which is excluded, and the sum of the result with its extended uncertainty.
LoD is the detection limit and identifies a confidence interval of zero with a probability interval of about 99%. LoQ is the limit of quantification."n.d" is not detected and indicates a value inferior to the LoD. "traces (X)" means a value between LoD and LoQ, this value is indicative. "<x" or ">x" indicate inferior or superior to the measurement field of the test. Unless otherwise specified, sums of parameters are established based on the Lower Bound (L.B.) principle in which only parameters

follow test report n. 25/000524284

above LOQ are considered. In case all components of a sum are below their respective LOQ, the sum is reported as <"x", where x is the highest LOQ among the analytes involved in the calculation. Analysis Starting date: date at which the sample is processed by the laboratory. Can include aliquoting and homogenization steps. Analysis End date: date at which the results are approved in LIMS by the laboratory. In case of alteration of the sample the laboratory declines any responsibility on the results that can be influenced by the deviation in case the customer asks for the execution of the test anyway. If the sampling is not carried out by the laboratory staff, the results obtained are considered referring to the sample as received and the laboratory declines its responsibility for the results calculated considering the sampling data provided by the Customer. The name and contact information of the Customer are always provided by the Customer.

R is the recovery, recoveries marked by an hashtag (#) have not been used in the calculations.

If there is a specification (customer specifications, law limits) which has been compared to the analytical results, the values shown in bold indicate a result which is out of the specification. If not differently specified the judgments of compliance /noncompliance eventually reported are referred to analysed parameters and are based on the comparison of the value with the reference values without considering the confidence interval of measure.
